PROFILE

Computer Science graduate and web designer-developer with five years of writing code. I take a brief from a blank page to a live URL: the interface, the code behind it, and the deployment. My work is **static-first** and **type-checked**, because a site that loads fast and a codebase someone else can read are the same craft — and I document what I hand over.

SELECTED WORK

Akin — Portfolio & case study site

NEXT.JS · 2026

Designed and built this site from scratch: a static-exported Next.js build with Tailwind, animated section reveals, a validated contact flow, generated Open Graph images, structured data, sitemap and per-page metadata. Twelve pages prerender to HTML; first load is 119 kB of JavaScript.

akinfolio.vercel.app

Crave Spot — restaurant landing page

HTML · CSS · BOOTSTRAP

A responsive single-page build practising layout, the box model and component structure in Bootstrap, with progressively added JavaScript for interaction.

github.com/investor-Akin/crave-spot

Palindrome Checker & Grade Checker

JAVASCRIPT

Two small logic tools built to make input handling, conditionals and string manipulation stick: one reverses and compares a string, the other maps a score to a grade band.

EXPERIENCE

Freelance web design & development

2021 — PRESENT

Self-employed · Oyo State, Nigeria

- Take small-brand briefs from positioning through to a live site: structure, visual design, build and handover.
- Ship static-first sites on Vercel, keeping page weight and first-load JavaScript low on slow mobile connections.
- Write handover documentation so a client or a second developer can change content without me.

Self-directed engineering practice

ONGOING

Building in public: shipping small projects, reading the source of the tools I use, and rewriting what I build once I understand why it works. Currently extending into full-stack with Node, Express, MongoDB and Supabase.

SKILLS

Markup & style

HTML5 · CSS3 · Tailwind CSS · Bootstrap 5 · Responsive layout

Front-end

JavaScript · TypeScript · React · Next.js

Back-end & data

Node.js · Express · MongoDB · Supabase · Firebase

Tools & workflow

Git · GitHub · Vercel · Figma · VS Code

EDUCATION

Adeleke University

BSc Computer Science

Second Class Upper (2:1) · July 2026

CERTIFICATIONS

Microsoft Office Specialist — Word

New Horizons Computer Learning Centers

Full-Stack Web Development

SQI Tech School · Poolot Tech School

LOOKING FOR

A front-end or full-stack role where I can own a feature from design to deploy. Open to junior and mid-level teams anywhere in Nigeria, or fully remote.

ALSO

English (fluent) · available immediately · references on request.
